How We Do Business

Intouch Telecommunications has been a provider of innovative telecommunications, network services, security and support services solutions for major commercial, institutional and industrial enterprises since 1992. Our mission is to provide a menu of products and services that deliver increased productivity, improved efficiency, faster response time, lower communications cost and a competitive advantage for our clients.

Intouch with the Industry

With over 40 years of collective experience, our team of experts receives ongoing training and development, which enables us to solve communications related issues, from simple to complex installations. Our technicians, engineers and project managers support diverse network/telecommunications equipment and systems.

Intouch with our Clients

Intouch Telecommunications is responsive and dedicated to excellence. In providing customer solutions, the relationship is that of partnering to accomplish both critical and non-critical objectives, beginning with the requirements analysis, strategic planning, and all phases of interaction, customer care is a priority. Our client list and client retention rate is reflective of this customer care philosophy.

Intouch
Telecommunications,
Inc.

A single source for all of your telecommunications, networking, connectivity, and security solutions.

Telecommunications

Telecommunications technology in the 21st Century is important to any business success. As communication technologies converge, understanding the important aspects of its effectiveness and the benefits to your business is critical.

Intouch Telecommunications provides the installation and maintenance of the following customer premise equipment and services: Business Telephone Systems, Call Centers, Conference Calling, Local and Long Distance Telephone Service, Message/Music On Hold, Overhead Paging, Unified Messaging, Voice Over IP and Voicemail.

Network Communications

The critical nature of today's applications makes network performance critical for business success. Networks must be adaptive to dynamic changing environments. Networks should also be manageable, scalable and have easy integration with network components.

Intouch Telecommunications can provide: Data Centers, High Speed Data and Internet Access, Network Cable Infrastructure, Network Security, Router & Switching Technology, Web Hosting and Wireless Networking.

Security

All businesses need to protect themselves, their customers, employees and visitors. Security helps businesses reduce liability, and improve safety and deter crime.

Intouch Telecommunications provides installation and maintenance of security technologies such as: Access Control Systems, Closed Circuit TV and Video Surveillance, Identification Technologies and Intercom Systems.

Support Services

Intouch Telecommunications also provides many support services such as: Abandoned Cable Removal, Cable Plant Design, Installation and Maintenance, Communications Equipment Procurement Support, Network Design and Engineering, Site Surveys & Requirements Analysis and Staff Augmentation.

Technology Solutions for the 21st Century and Beyond.

Did You Know?

Voice Over
Internet Protocol
(VoIP)
(pronounced "vee-oh-eye-pee" or "voyp")

- Phone service via VoIP is free or costs less than equivalent service from traditional sources.
- VoIP allows users to travel anywhere in the world and still make and receive phone calls.
- VoIP can be hosted or customer premise equipment based.
